

# DIGITAL HUMANITIES CENTERS AROUND THE GLOBE

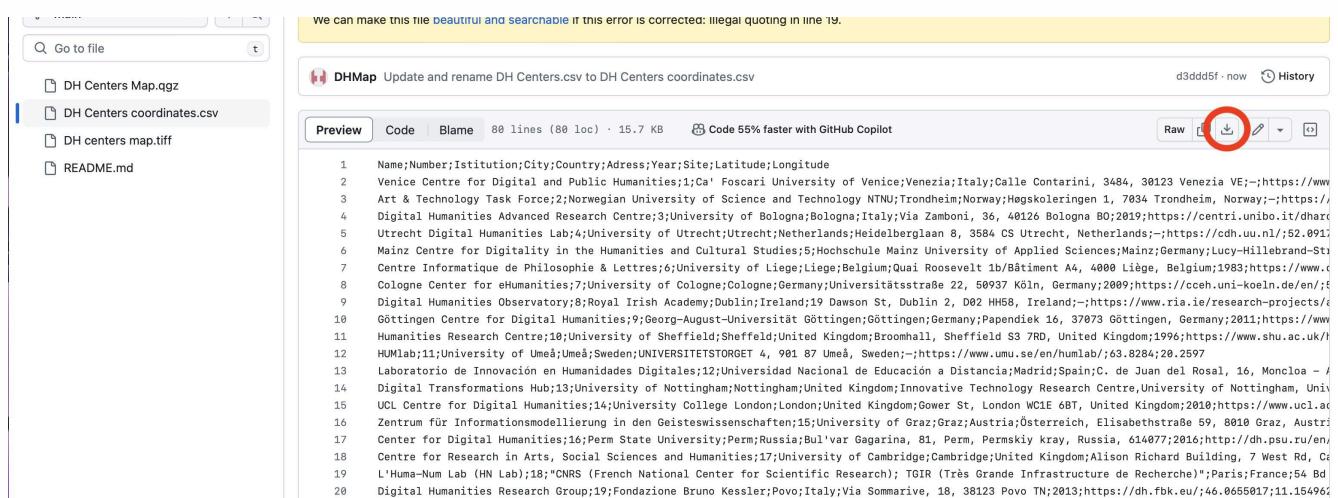

## GUIDE: HOW TO INSERT A CENTER IN THE MAP ?

1. Firstly, find the coordinates for the center you want to add.

Latitude	Longitude
454.350.997	123.231.063
634.195.043	104.019.248
444.965.321	113.511.481
520.917.954	51.256.438
499.885.302	82.275.109

This is an example. Source: Authors.

2. Download and open the CSV file named "DH Centers coordinates" contened in the Github Repository.

The screenshot shows a GitHub repository interface. On the left, there's a sidebar with files: 'DH Centers Map.qgz', 'DH Centers coordinates.csv' (which is selected), 'DH centers map.tif', and 'README.md'. The main area displays the contents of 'DH Centers coordinates.csv'. The first few lines of the CSV are:

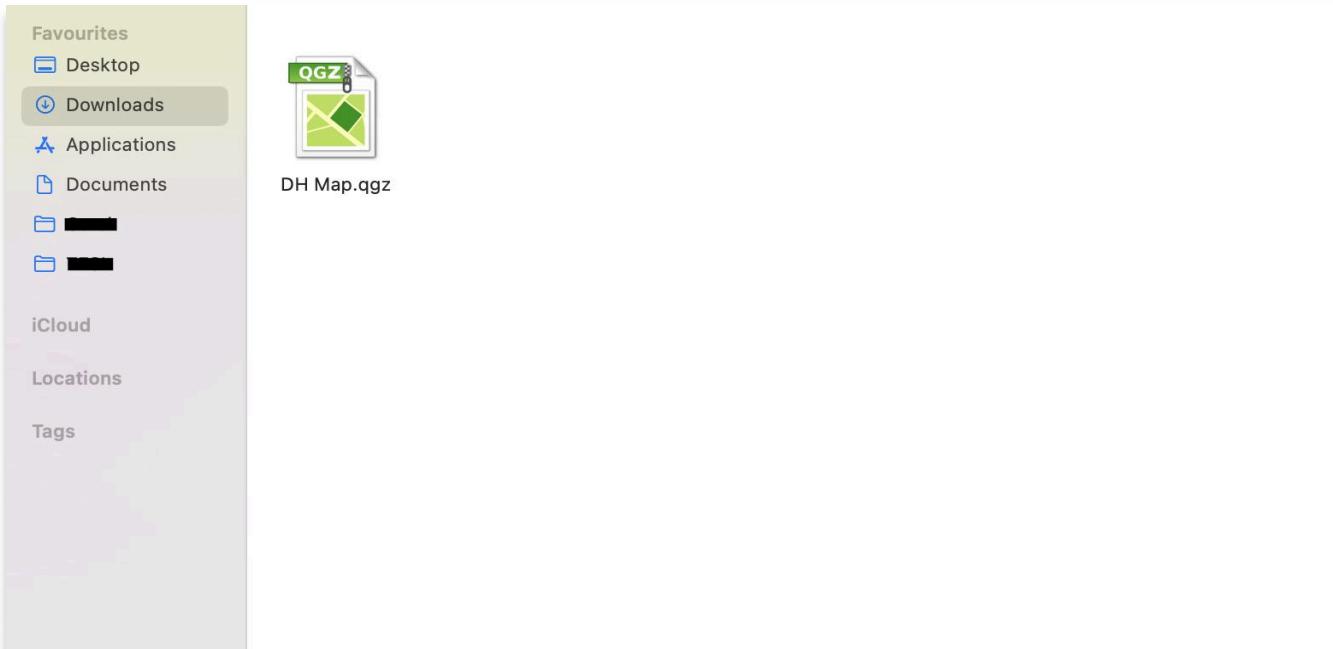

```
1 Name;Number;Institution;City;Country;Address;Year;Site;Latitude;Longitude

### 4. Download and open the QGZ file named “DH Centers Map” in QGIS or other GIS software.

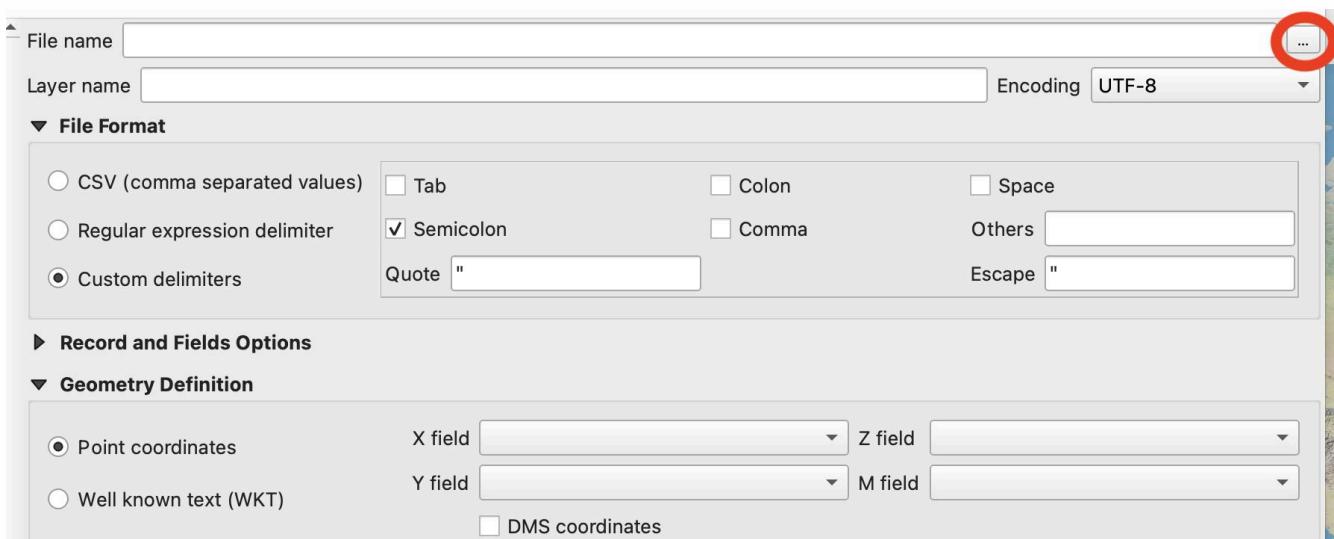

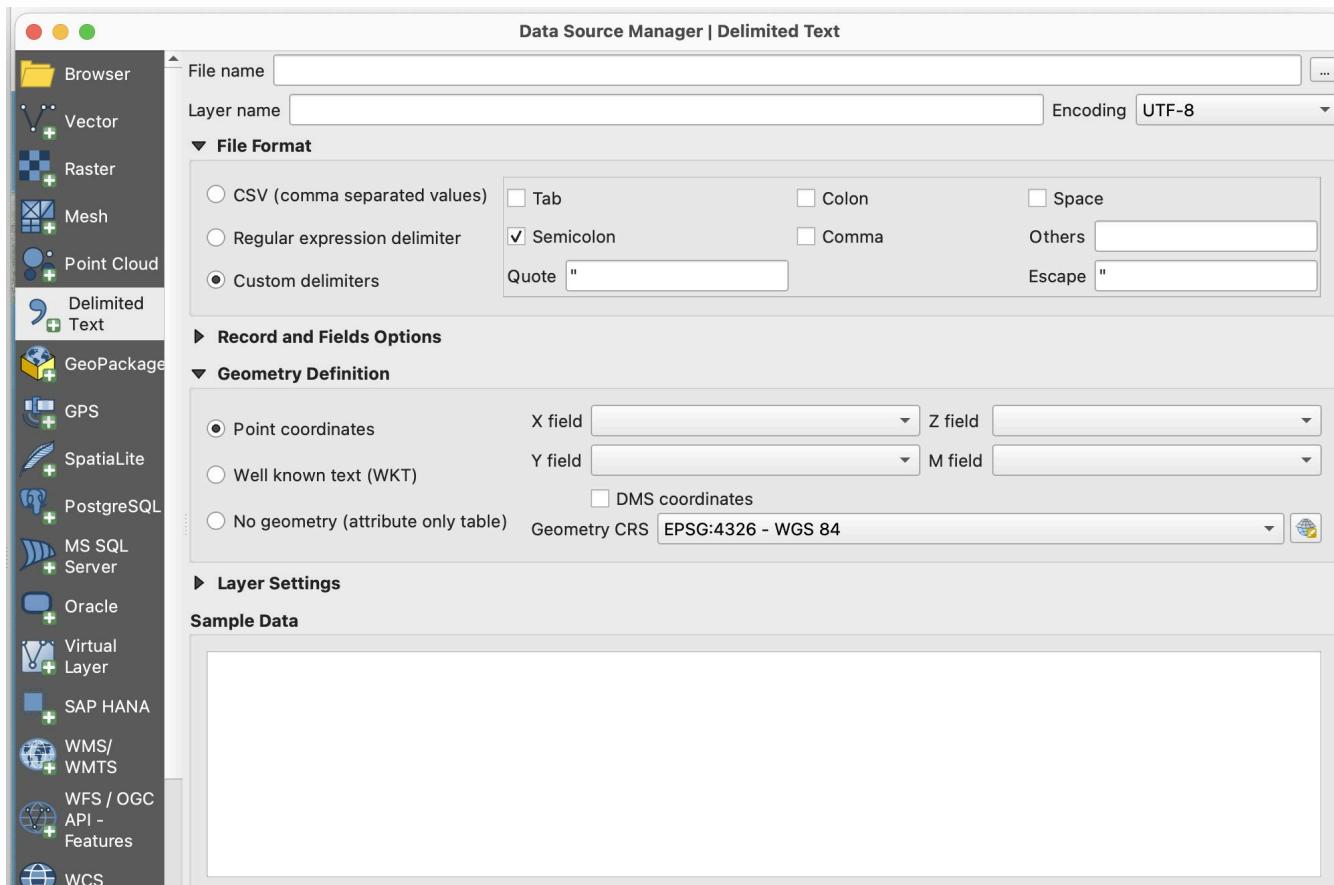

## 5. Find the “Add Layer” section in the software.

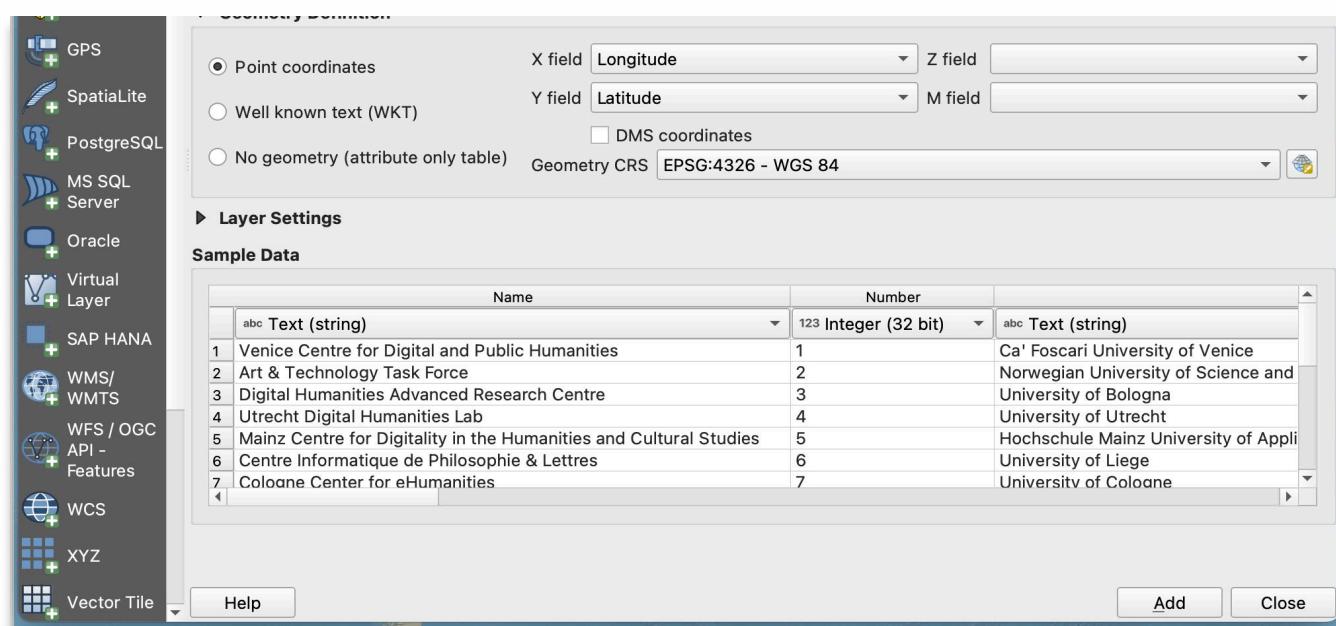

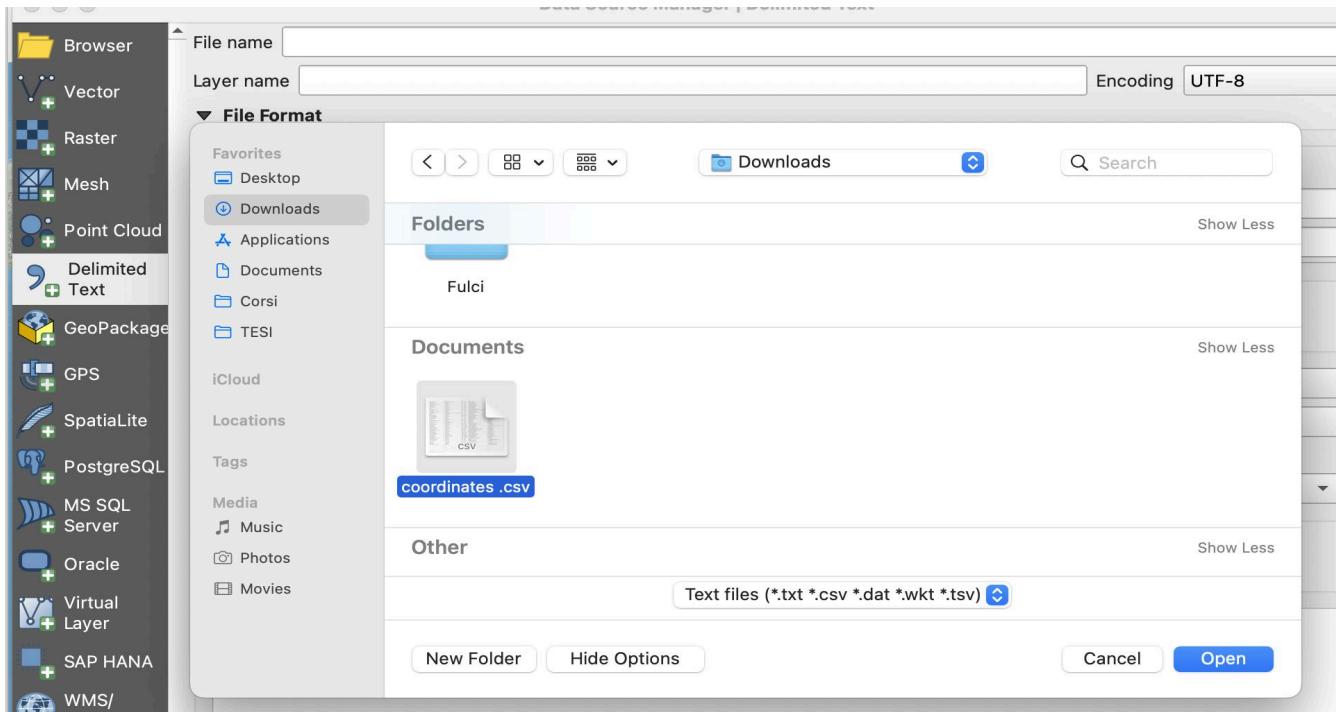

## 6. Select “Add Delimited Text Layer”.

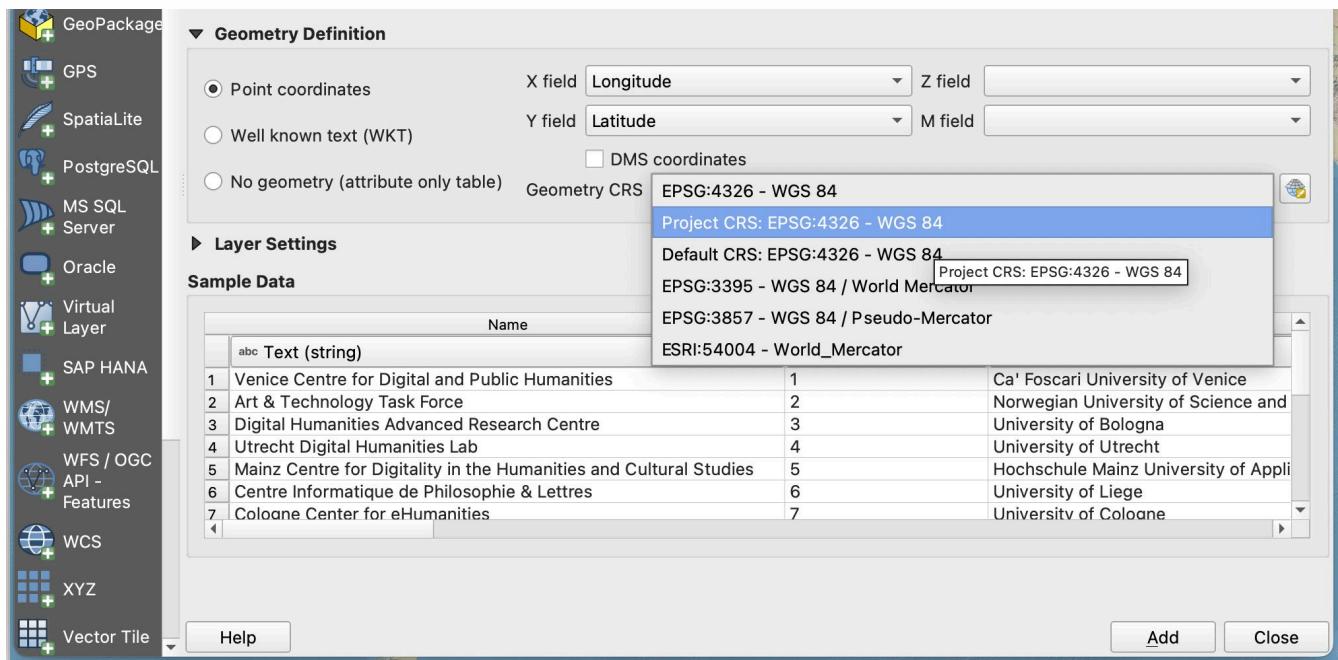

7. In the “Create a Layer from a Delimited Text File” dialog, click on browse and specify the path to the CSV file you created. During this operation, you may see some errors displayed in the next dialog. The errors in this file are mainly due to missing X or Y fields. You may examine these errors and fix the problems in your source file.

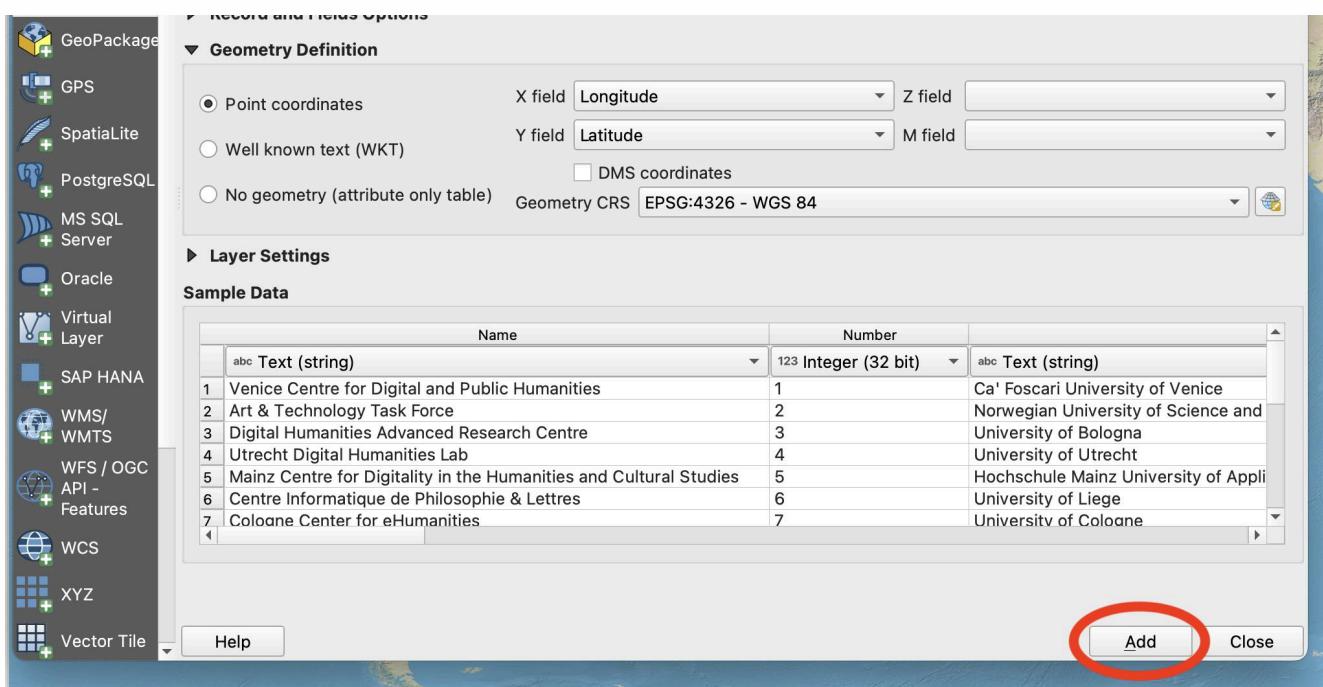

8. It is crucial that you check the “Coordinate Reference System Selector” and select a coordinate reference system. Usually QGIS tells you the coordinate reference system used in your proget, select this one.

9. Confirm the operation in the software by clicking “Add”.

## 10. Now you will see the center you added, alongside the other centers.
